PROFESSIONAL SUMMARY

Engineering leader with 13+ years of experience in mobile and full-stack development, specializing in fraud prevention, mobile security, and SDK platforms. Proven track record of building and scaling high-performing teams, defining global technical strategies, and delivering secure, scalable solutions across Android, iOS, and APIs. Strong background in people leadership, M&A integration, and cross-border collaboration with global teams.

WORK EXPERIENCE

SERASA EXPERIAN (*Experian Group – ~22,000 employees globally*)

Software Engineering Manager | Apr 2024 – Present

- Head of the entire Anti-Fraud SDK area, leading 22 professionals (employees and contractors) across Android, iOS, APIs, and QA teams.
- Responsible for SDK platforms supporting three major products: Device Intelligence, Liveness Detection, and Document Analysis.
- Led the integration and unification of SDK teams originating from multiple M&A acquisitions over recent years.
- Defined and executed the technical and organizational strategy for fraud SDKs in close collaboration with Experian global teams.
- Acted as a strategic partner to global leadership, contributing to the worldwide roadmap for fraud prevention SDKs.
- Recipient of the Experian “Recognition Award”, honoring top-performing professionals across the company.

ALLOWME (*Tempest Security – acquired by Experian for USD 45M | ~400 employees*)

Lead Mobile Software Engineer | Jun 2019 – Mar 2024

- Led mobile SDK development focused on fraud detection with a strong emphasis on cybersecurity and cryptography.
- Built and scaled the mobile team from 4 engineers to a mature structure prior to acquisition.
- Designed and implemented mobile security standards, encryption strategies, CI/CD pipelines, automated testing, device farms, and release processes from scratch.
- Played a key role in the company’s growth, contributing to its acquisition by Experian.
- Worked closely with product, security, and backend teams to deliver highly reliable anti-fraud SDKs.

LIFERAY INC. (~4,000 employees globally)

Lead Mobile Software Engineer | Mar 2017 – Jun 2019

- Joined as a Software Engineer with the goal of refocusing on mobile development, quickly progressing to Mobile Team Lead for LATAM.
- Led Android and iOS teams while collaborating closely with global teams based in Madrid (Spain) and California (USA).
- Contributed to enterprise mobile solutions used by global customers.
- Acted as a bridge between regional and global teams, aligning mobile strategy and execution.

FACILIT TECNOLOGIA (~200 employees)

Software Developer | May 2013 – Mar 2017

- First professional experience, starting as a Mobile Developer and later acting as Full-Stack Engineer when needed.
- Worked on Android, Java Web, Windows Phone, and backend systems, enabling strong cross-functional collaboration.
- Assumed the role of Scrum Master due to strong communication skills and leadership potential.
- Led agile ceremonies, guided team execution, and became a Certified ScrumMaster.
- This early leadership experience laid the foundation for future management roles.
